Languages

Italian (Native)
English (Advanced)
Portuguese (Basic)

I am a frontend web developer and UI designer. My background in fashion design and analytical mind, allows me to bring digital products to life.
Since August 2019, I have been designing and building clean and accessible user interfaces within the Javascript ecosystem. I enjoy working in collaborative environments and solving challenges as a team.

Experience

Frontend Engineer at Constellr

Brussels, BE

March 2024 - Present

- Sole frontend engineer responsible for designing, architecting, and delivering a scalable platform that enables internal teams and external clients to order and access thermal geospatial data products derived from satellite imagery
- Initiated the project from scratch, leading the frontend architecture using a modular monorepo setup with Next.js and TypeScript
- Designed and built key features for browsing, selecting, and requesting satellite imagery across spatial and temporal dimensions, with a focus on usability and performance
- Collaborated closely with backend engineers, geospatial engineers and product team to define data contracts, shape APIs, and ensure seamless end-to-end integration across services

Tailwind - Next.js - JavaScript - Typescript - Leaflet - Jest - Docker - AWS

Frontend Engineer at Farfetch

Lisbon, PT

May 2022 - Present

- Designed and implemented internal developer documentation to support onboarding, maintainability, and cross-team collaboration
- Built and shipped customer-facing features for clients’ e-commerce storefronts, focusing on performance and user experience
- Contributed to open-source SDKs, improving usability, documentation, and extending core functionality

HTML - CSS-in-Js - React - Next.js - JavaScript - Typescript - Jest - Storybook

UI Designer and Web Developer at The Clothing Loop

Amsterdam (remote)

Jan 2021 - Apr 2022

- Development of React and Typescript web application for a clothing exchange initiative (view project [here](#) and repository [here](#))
- Designed and coded the UI
- Built and enabled a team of 5 volunteer web developers

React - JavaScript - Typescript - Firebase - Sass - Material UI

E-Commerce Executive at Georgiana Scott

London, UK

Feb 2019 - Oct 2020

- Improved bounce rate by 20% and doubled total page views through website redesign, marketing campaigns and SEO
- Managed a Shopify E-Commerce
- Liaising with web developers

Further Experience

Sales and Product Major at Moncler

London, UK

Jan 2018 - Feb 2019

First point of contact for Moncler own products within the Harrods concession. Managing product cycle including stock maintenance, movements across Europe, aftercare services and customer inquiries.

Brand Manager at Harrods

London, UK

May 2015 - Jan 2018

Responsible for the overall performance within the kidswear division of Moncler products through sales and stock management.

Sales Advisor at Bottega Veneta

London, UK

Sept 2014 - April 2015

Part-time role covered while completing my BA degree course. Sales in a target-driven environment with a focus on private clients.

Store Supervisor at Banana Republic

London, UK

May 2012 - Aug 2014

Part-time role covered while completing my BA degree course. Supervised a team of 20 across several roles within a KPIs-based environment.
